

Illegal Dumping

Covert Enforcement Solutions

Background

Illegal dumping has become an increasingly large problem throughout the world.

Most illegal dumping is done in remote isolated locations, which makes law enforcement complex and the likelihood of being caught low.

Law enforcement is difficult, especially in
Offenders often dump late at night to avoid the cost and inconvenience of proper waste disposal.

Illegal Dumping Impacts

1. Cost And Effort

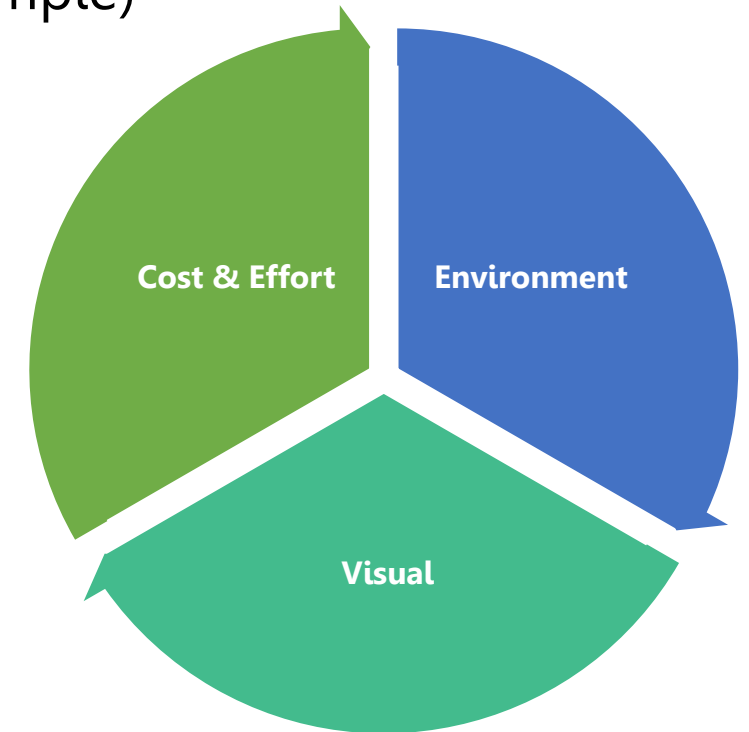

- Removing illegally dumped waste
- Surveillance and law enforcement costs
- Subtracted revenue from waste contractors which should have paid if disposed legally (asbestos waste for example)

2. Visual Impact

- Reduce Real-estate prices
- Damage to municipality/government reputation
- Reduce tourism

3. Environmental Impact

- Water pollution
- Hazardous materials
- Harm to wildlife

Law Enforcement Challenges

- 1 Limited budget per illegal dumping site for law enforcement and surveillance
- 2 Limited manpower to watch over those sites/analyze cameras video
- 3 Illegal dumping sites locations may change over time
- 4 Usually remote isolated area without power supply

The Offered Solution- Covert Surveillance

Covert surveillance system based on wireless seismic sensors which installed (buried) on the illegal dumping area.

What's in the Kit:

Wireless Seismic Sensor

Wireless Receiver

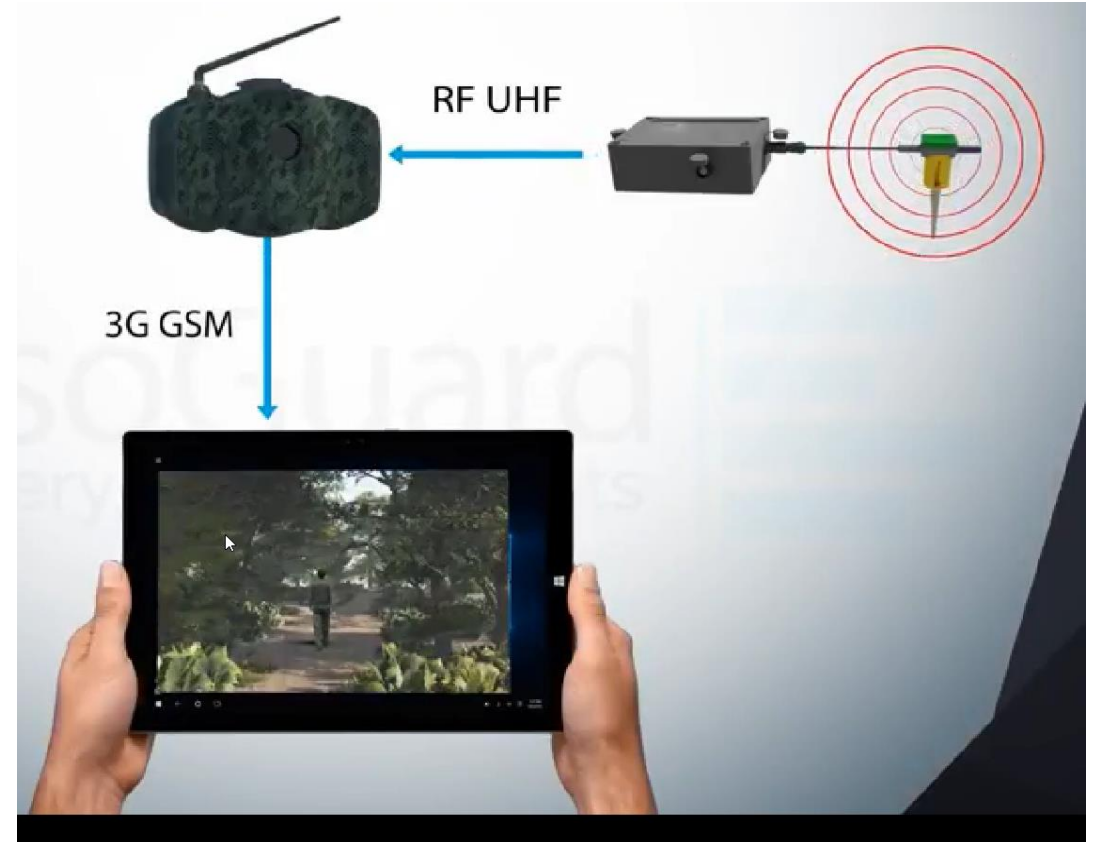

GSM HD camera

Watch Video

How It works

- 1 Buried seismic sensors are installed on the illegal dumping site
- 2 The sensors constantly monitors the area
- 3 Upon alarm detection- a remote hidden wireless camera is being triggered by the seismic sensors
- 4 Camera take a snapshot/video clip and send it immediately to cloud server / smartphone

System Advantages

Invisible System

Fog Resistant

Ultra Low Power

Maintenance free

Wind Resistant

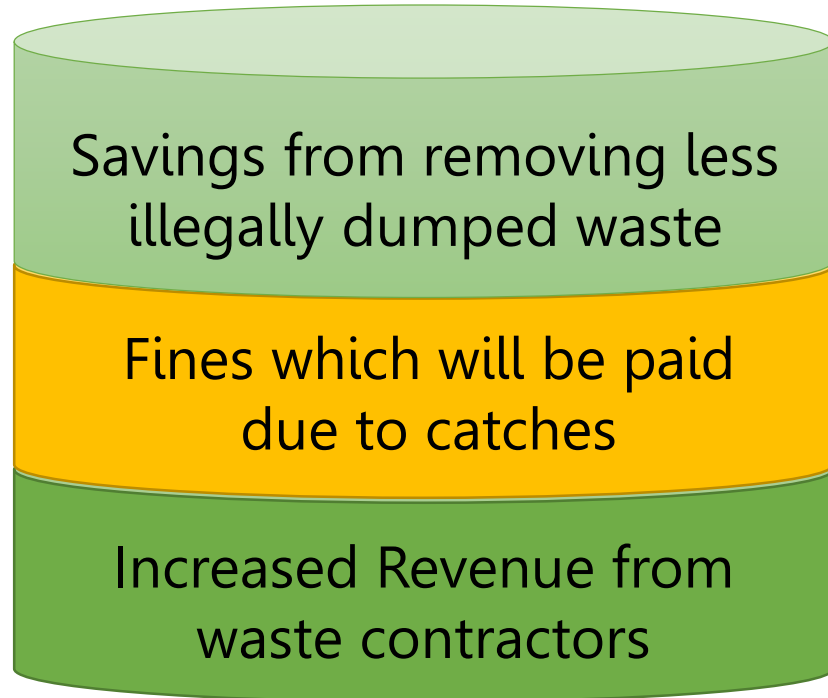

-40°C - +85°C

- Reduce manpower required to monitor many sites simultaneously
- Reliable 24/7/365: Immune to environmental conditions
- Maintenance free + battery operated for months
- Simple and fast Installation, re-deployable
- Invisible system (covert surveillance)
- Cost effective

ROI – Return On Investment

How Do I return The Investment Of the System ?

Re-Deploy In a new site and start over...
